

Are You Willing to Spend \$12,000 More for the Same Service?

Did you know that tests such as MRIs, CTs and mammograms don't cost the same everywhere you go? Outpatient surgeries can vary even more. Here are just a few examples from The Alliance's *QualityCounts*® Outpatient Procedures and Tests Report:

- » CAT Scan of the Pelvis with Contrast can vary by as much as \$1,658
- » Upper GI Endoscopy can vary by as much as \$3,300
- » Laparoscopic Hernia Surgery can vary by as much as \$12,419

Now available, use this report to compare costs for outpatient tests and procedures in The Alliance network.

To access, visit the-alliance.org/qualitycounts and click on **View Reports**. You can also use our Find a Doctor tool at the-alliance.org/find_doctor. If you see the *QualityCounts* logo when you search, it means you can access this information.
